PHOENIX MUTUAL LIFE INSURANCE COMPANY,

Who took out a 20-Year Endowment, near middle life, is very much
alive. This is how he won:

He Received
at maturity, the face value of the policy— \$10,000
He Paid
twenty annual premiums and received in annual dividends
\$2,500, making the net cost only \$7,280

His Profit was \$2,720 or over 37 per cent more
than he paid, even at his age.

Had he died during the 20 years, his Beneficiary would have received
the \$10,000 plus the annual dividends up to that time, whatever year, which,
say, at two years would have been \$10,230, at ten \$11,330, and so on. THIS
